

Here are a few ways to make an antique high-pressure laminate Formica table top shiny again, but the best method will depend on the condition of the surface and the severity of the dullness. Here are a few options to consider:

For mild dullness:

- **Clean the surface thoroughly:** Start by removing any dust, dirt, or grime with a mild soap and water solution. Rinse well and dry completely with a soft microfiber cloth.
- **Use a furniture polish:** Apply a light coat of a good quality furniture polish designed for laminate surfaces. Buff with a soft cloth to a shine.
- **Try a vinegar and water solution:** Mix equal parts white vinegar and water in a spray bottle. Spray the solution onto a microfiber cloth and wipe the surface of the table. Rinse with clean water and dry completely.

For moderate dullness:

- **Use a scratch remover:** If the table has minor scratches, you can use a scratch remover designed for laminate surfaces. Follow the instructions on the product label carefully.
- **Buff with a polishing compound:** Apply a small amount of a polishing compound designed for laminate surfaces to a soft cloth. Buff the surface in a circular motion until it regains its shine. Be careful not to buff too hard, as this can damage the surface.

For severe dullness:

- **Wet sanding:** If the table is very dull or has deep scratches, you may need to wet sand it. This is a more advanced technique, so it is best to consult with a professional if you are not comfortable doing it yourself.
- **Refinishing:** In some cases, the best way to restore the shine to a Formica table top is to refinish it. This is a major project that should only be undertaken by someone with experience in refinishing furniture.

Here are some additional tips for restoring the shine to a Formica table top:

- Always test any cleaning product or polish on an inconspicuous area of the table first to make sure it does not damage the surface.
- Work in a well-ventilated area.
- Avoid using harsh chemicals or abrasive cleaners, as these can damage the surface of the table.
- Do not use wax on a Formica table top, as it will leave a film and make the surface dull.

With a little care and effort, you should be able to restore the shine to your antique Formica table top and make it look like new again.
